

## **Chemistry Today**

Founded in 1983 as a peer-reviewed, bimonthly journal, it quickly became a leading journal in linking industry and academia and gained an immediate appreciation worldwide. Its contents range over many different fields such as Fine chemicals, Biotechnology, Pharmaceuticals Supply Chain, Regulation, etc... yet they always conform to the company's editorial policy requiring to follow a strict scientific approach as regards the articles published.

The scientific contents are carefully selected: most of the scientific manuscripts submitted are subject to a reviewing procedure entrusted to competent referees some of whom belong to our scientific advisory board. Recently we have increased our editorial work by adding Interviews and Panel Discussions.
